Message from Chairman & Managing Director

Dear Stakeholders,

As we welcome the New Year, SBSL moves forward with renewed confidence, commitment, and ambition. We step into this year with a strong vision of achieving a ₹200 crore top line FY 26-27, and we thank all our vendors, stakeholders, and employees who continue to be the pillars of our success.

We are proud to share that INS Neelam and ICGS Savitribai Phule projects were successfully completed on time.

A significant milestone in our journey is the successful docking of the INS Kabra refit, the first in 23 years, setting a historic benchmark for our company. Concurrently, work continues on the private vessel Ubaidulla, while upcoming confirmed projects, including ICGS Amartya, ICGS Abhinav, ICGS C-441 and WB Ambuda, will further enhance our order book.

In line with our expansion strategy beyond Kerala, we are broadening our operational footprint at the Chennai Timber Pond slipway and undertaking strategic engagements with the Coast Guard. Plans are in place to dock IB vessels at the North Yard. Simultaneously, we are progressing with the upgradation of key infrastructure, including yard development, construction of a telescopic slipway shed, enhancement of equipment, and strengthening of safety protocols, to establish a robust and future-ready operation.

In association with DOCA Medcity, a medical camp was conducted at SBSL for employees, led by Dr. Ansal, Managing Director of DOCA Medcity, reinforcing our commitment to employee health and preventive care.

We had official review meetings with the Naval Officer in Charge, Mr. Varghese Mathew (NOIC), to review ongoing activities, strengthen coordination, and ensure full compliance with naval requirements and standards. We were also honored by the visit of Dr. Premanand Shenoy, Managing Partner & Chief Consultant of Roy & Shenoy, who visited SBSL to discuss shipyard development schemes and long-term developmental policies, further reinforcing our strategic growth roadmap.

We also acknowledge the valuable interaction and guidance received during the meeting with Cmde George Mathai, AGM (P&I & Com), NSRY, which further strengthens our collaborative efforts and future direction.

As we enter this New Year, let us move forward together with discipline, teamwork, and dedication to make SBSL stronger, more efficient, and more successful than ever before.

Wishing all our employees, stakeholders, and partners a Happy, Prosperous, and Successful New Year.

Manoj Prabhu

Chairman & Managing Director
Sea Blue Shipyard Ltd.

Message from Deputy General Manager (Business Development)

Sea Blue Shipyard Limited (SBSL) continues to progress with clarity of purpose and strategic intent, reinforcing its position as a trusted partner in India's ship repair and defence support ecosystem. Guided by our CMD's Vision 2030, the past two months have witnessed notable operational achievements, geographic expansion, and capacity-building initiatives that collectively strengthen our long term growth trajectory.

A key operational highlight was the successful completion and delivery of the special refit of ICGS Savithri Bai Phule to the Indian Coast Guard. This complex assignment was executed to schedule, reaffirming SBSL's technical depth and commitment to quality. In parallel, we also completed the short refit of Ferry Craft FC Neelam and handed over the vessel to the Indian Navy, further consolidating client confidence in our execution capabilities.

As part of our structured growth plan, SBSL has formally opened a branch office in Chennai, marking a significant step in expanding our footprint in the Eastern maritime corridor. In alignment with this initiative, the registration and technical assessment of Eastern region vessels of the Indian Coast Guard are currently in progress. Simultaneously, capacity enhancement measures are underway to increase the number of vessels registered in the Western region, enabling SBSL to accommodate additional Coast Guard assets. Assessment activities for the Indian Navy's sail vessels INS Tarangini and INS Sudarshini are also in progress, reflecting our intent to diversify our refit portfolio.

Another defining milestone is the docking of INS Kabra at SBSL for a major refit, now in active progress. The contract value of this project is nearly three times higher than any refit undertaken at SBSL over the past 23 years, representing a historic benchmark in the company's evolution. In addition, a confirmed pipeline of seven vessels is now secured, which will engage our slipway dock continuously until Sep 2026, providing strong visibility of revenue and workload stability.

These achievements, coupled with ongoing investments in infrastructure, systems, and human capital, underscore SBSL's steady ascent towards becoming a ₹1000 crore enterprise by 2030. Each milestone reflects our collective commitment to excellence, reliability, and sustainable growth.

Lt. CA Thomas (Retd.)

Deputy General Manager – Business Development
Sea Blue Shipyard Ltd.

Message from Deputy General Manager (Operations)

The months of Dec 25 and Jan 26 have been marked by sustained operational activity and steady progress at Sea Blue Shipyard. During this period, our teams have once again demonstrated their ability to manage and execute complex refit projects through disciplined planning, coordinated execution, and a shared commitment to excellence. The collective effort across production, engineering, and support functions continues to strengthen our position as a reliable ship repair partner for defence and commercial customers alike.

One of the notable achievements during this period has been the timely completion of the refit of FC Neelam. The project involved extensive and critical hull renewal works, demanding precise sequencing of activities and close coordination among multiple departments. Delivering such a demanding scope within the committed schedule reflects the effectiveness of our planning processes, the technical competence of our teams, and the dedication displayed at all levels of execution.

In the same period, the ERDD of ICGS Savitribai Phule was also completed on schedule. The successful execution of this refit reinforces our reputation for dependable delivery and strict adherence to the quality standards expected by our defence customers. Consistency in meeting timelines while maintaining workmanship remains one of Sea Blue Shipyard's core strengths.

The Medium Refit of INS Kabra commenced on 05 Jan 26, with the vessel being docked on 06 Jan 26. The project has transitioned smoothly into the execution phase, and major underwater works are currently in progress. The initial stages have been carried out in a structured manner, ensuring compliance with technical requirements and establishing a strong foundation for the subsequent phases of the refit.

In parallel, the shipyard is making steady progress on infrastructure development. The construction of the telescopic structure for the slipway and the strengthening of the North Yard are progressing in full swing and will significantly enhance our operational capability and readiness for future projects.

I sincerely commend the dedication and teamwork demonstrated by our workforce and stakeholders. By sustaining this momentum, we will continue to serve our valued customers with professionalism, reliability, and commitment to excellence.

K. Rajesh Kumar

DGM (Operations)
Sea Blue Shipyard Ltd.

Message from Human Resources

In a dynamic and competitive maritime environment, organizations succeed not merely because of systems, technology, or infrastructure, but because of the people who bring them to life every day. At our Shipyard, we have always believed that our manpower is our greatest strength and most valuable asset, and this belief continues to guide every initiative we undertake.

As we steadily progress towards becoming a more system-driven, process-oriented, and future-ready organization, the role of Human Resources assumes greater significance. HR is not just a support function – it is a strategic partner in shaping culture, strengthening capabilities, and fostering an environment where every employee feels valued, respected, and empowered to contribute their best.

Over the past two months, it has been encouraging to witness enthusiastic participation in various employee welfare, engagement, and developmental initiatives. These activities are not standalone events; they are deliberate efforts to strengthen employee–employer bonding, promote well-being, and nurture a sense of belonging across all levels of the organization. A motivated and engaged workforce is the cornerstone of productivity, quality, and sustainable growth.

Change is most effective when it is embraced collectively. As systems evolve and processes are strengthened, your co-operation, adaptability, and commitment remain vital. Each one of you plays a crucial role in reinforcing our organizational values – discipline, teamwork, integrity, and excellence.

I take this opportunity to sincerely appreciate the dedication and hard work of our employees, as well as the support extended by various departments in making HR initiatives meaningful and impactful. Let us continue to work together in a spirit of trust and collaboration, ensuring that our Shipyard not only excels in shipbuilding and repair but also stands as a benchmark for people-centric practices in the industry.

Together, let us sail forward with confidence, pride, and a shared commitment to excellence.

Warm regards,

Sreekumar

Head – Human Resource

Sea Blue Shipyard Ltd.

Message from the Manager – Store

During December and January, the Stores Department was actively engaged in managing materials for key projects including INS Kabra, ICGS Neelam, and ICGS Savithribai Phule, while concurrently supporting the ongoing yard expansion activities.

The Purchase Department continued to ensure uninterrupted material supply, strengthened vendor coordination, and maintained cost efficiency across all projects. Procurement processes were streamlined to support critical operations through timely deliveries, with close coordination across departments to meet project requirements.

I appreciate the continued efforts of all teams and vendor partners in maintaining operational effectiveness and momentum.

Niju Poullose
Manager – Store
Sea Blue Shipyard Ltd.

Outsourcing Departmental Brief

The Outsourcing Department plays a key role in ensuring the timely execution of specialized technical services through effective coordination with external vendors, service engineers, and calibration agencies. Serving as a vital link between internal departments and approved third-party providers, the department emphasizes quality, compliance, and cost efficiency.

Core responsibilities include vendor identification and evaluation, coordination of service engineers for onboard trials and repairs, monitoring lead times, and ensuring adherence to contractual and technical standards, including NABL certifications. The department also supports project teams by managing logistics, transportation, and documentation to minimize delays.

By fostering long-term partnerships and negotiating competitive pricing, the Outsourcing Department contributes significantly to smooth project execution and overall operational efficiency.

Preethi Rajan
Production Co-ordinator
Sea Blue Shipyard Ltd.

Insights from Production

The Production Department continues to demonstrate strong operational performance, efficiently handling diverse ship repair and engineering fabrication activities. Our commitment to timely delivery, technical excellence, and the highest safety standards remains unwavering. A summary of completed, ongoing, and upcoming projects at the yard is presented below.

Ship Repair Projects

ICGS SB Phule – Fast Patrol Vessel

- Owner: Indian Coast Guard
- Work Done: Short Refit
- Work Period: 24th Nov 25 to 19th Jan 26
- Completion Status: 100% Completed

ICGS SB Phule, a 48-meter fast patrol vessel of the Indian coast guard, recently underwent a comprehensive short refit package. The scope of work included critical underwater maintenance activities

such as hull inspection, cathodic protection renewal, minor hull plating renewal, and afloat repair works. Engineering system overhauls included STP system servicing, ICCP system maintenance, and gyro compass overhaul—all essential for maintaining operational readiness.

The project was successfully completed ahead of schedule, and the vessel was delivered to the owner in full operational condition. The successful execution of this project further underscores our commitment to supporting the Indian coast guard's mission readiness through timely and reliable ship repair services. The production department continues to maintain a strong focus on quality, precision, and client satisfaction.

FC Neelam – Ferry Craft

- Owner: Naval Ship Repair Yard
- Work Done: Short Refit
- Work Period: 15th Aug 25 to 15th Dec 25
- Completion Status: 100% Completed

Fc Neelam is a 218-ton ferry craft designed for the transportation of personnel and materials to ships at anchor and berth. The refit scope included extensive hull and superstructure plate renewal works.

Approximately 13 tons of plate renewal were completed, along with full de-gutting and completion of all electrical works.

Engineering activities included 1500-hour routine maintenance of main engines, 400-hour routine maintenance of dg sets, gearbox maintenance, overhauling of pumps, motors, and compressors, underwater painting, and rudder and propeller works. All planned tasks were completed in full, and the vessel was delivered prior to the scheduled completion date.

INS Kabra – High Speed Patrol Vessel

- Owner: Naval Ship Repair Yard
- Work Done: Medium Refit
- Work Period: 17th Dec 25 to 3rd Jul 26
- Completion Status: 30% Completed

INS Kabra is a 49-meter, 320-ton high-speed patrol vessel built by GRSE, Kolkata, and commissioned on 08 June 2011. Designed for anti-piracy, search and rescue, and patrol operations in India's exclusive

economic zone, the vessel is equipped with advanced water jet propulsion systems.

This is the first medium refit of ins Kabra. SBSL previously successfully completed the short refit of INS Kalpeni, the sister vessel of INS Kabra, in 2022. The total refit period for INS Kabra is 180 days, with 90 days at SBSL and the balance 90 days at NSRY.

Major works planned at SBSL include ABER items replacement, underwater and above-water hull plate renewals, underwater painting, habitability upgrades, ventilation trunking works, system pipelines and valves renewal, and underwater compartment painting.

As of date, underwater and superstructure blasting has been completed, pipelines and valves have been removed, habitability de gutting is complete, and plate renewal works are in progress. As part of this refit, water jet blasting technology was introduced for superstructure surface preparation, which was successfully executed and proved to be an environment friendly solution with reduced air pollution.

MV Ubaidhulla – General Cargo Vessel

- Owner: A & N Logistics
- Work Done: Under Water Routines
- Work Period: 13th Nov 25 to 13th Feb 26
- Completion Status: 50% Completed

MV Ubaidhulla is a general cargo vessel previously operated under the administration of the union territory and primarily served the maritime transport requirements of the Lakshadweep islands. The vessel

has now been taken over by A & N Logistics for operations in the Andaman and Nicobar islands.

The major works being executed by SBSL include overhauling of underwater valves, propeller shaft and rudder works, underwater plate renewals, tank cleaning and painting, and underwater painting. The vessel was docked using SBSL's balloon docking facility. As of date, approximately 50% of the planned works have been completed.

Project Testimonials

SBSL successfully completed the Short Refit (SR-03) of ICGS ANAGH. The overall performance of the yard was highly satisfactory.

Sea Blue Shipyard Ltd. successfully carried out the dry-docking and allied repairs of FC Neelam as part of Short Refit (SR/25). The overall performance of the yard was highly satisfactory.

Sea Blue Shipyard Ltd. successfully executed the Special Work Package (ERDD) for ICGS Savitribai Phule. The yard's overall performance was highly satisfactory.

Highlights of the Month

The Production Department maintains strong momentum while managing a diverse range of ship repair, maintenance, and engineering fabrication projects at the yard. Through disciplined planning, skilled execution, and strict adherence to safety protocols, the team continues to achieve project milestones efficiently. This collective effort has resulted in the successful completion and steady progress of several key assignments, which are outlined below.

Refit Progress Review of INS Kabra at SBSL

Cmde George Mathai, AGM (PL & Comm), NSRY, visited SBSL on 06 January 2026 to formally assess the progress of the Major Refit (MR 2026) of the Indian Naval Warship Kabra at SBSL. The visit involved a comprehensive review of ongoing refit activities, progress against approved schedules, and compliance with stipulated technical and quality standards.

Business Meeting with NSIC Officials

During the business meeting held with our CMD, NSIC Manager Mr. Rojan Chacko, and NSIC State Head Ms. Grace Reji, discussions focused on collaboration opportunities, strategic initiatives, future business prospects, and measures to strengthen long-term institutional cooperation, mutual growth, and coordination between the organizations.

Official Meeting with Naval Officer-in-Charge

An official meeting was held on 20 December 2025 at Sea Blue Shipyard during the visit of Mr. Varghese Mathew, Naval Officer-in-Charge (NOIC). CMD Mr. Manoj Prabhu, Lt. CA Thomas (Retd), and Mr. K. Rajesh Kumar participated to review ongoing activities, coordination, and naval compliance requirements and standards.

Strategic Interaction with Coast Guard Officials

An informal interaction over a cup of coffee was held with the Coast Guard Refit and Production Superintendent, DIG Gaurav Sinha, during his visit to SBSL on 27th January 2026. The discussion focused on the business plan for Coast Guard vessels, future requirements, and strengthening coordination for upcoming refit and production activities.

Review Meeting of INS Kabra at SBSL

A review meeting of INS Kabra was held at SBSL to assess project progress, technical aspects, and coordination requirements. The discussion focused on timelines, quality standards, and addressing operational challenges, ensuring alignment between teams and smooth execution of ongoing activities as per agreed objectives.

Project Success Get-Together

A get-together function was organized to celebrate the successful completion of the emergency dry-docking of ICGS Savitri Bai Phule. The occasion acknowledged the collective effort, teamwork, and commitment demonstrated by all involved in executing the project efficiently and within the stipulated timeframe.

Staff Meeting at Sea Blue Shipyard

A staff meeting was conducted at Sea Blue Shipyard to review ongoing activities, discuss operational matters, and align team members on current priorities. The session encouraged open communication, coordination, and collective responsibility to ensure smooth workflow and effective execution of organizational objectives.

SB Phule Completes Sea Trials After Dry-Docking

SB Phule successfully completed sea trials following an emergency dry-docking. The trials confirmed the vessel's performance, safety, and full operational readiness, highlighting the prompt, coordinated efforts and technical expertise of the entire team in ensuring the project's timely and effective execution.

Shipyard Development Review Meeting

We were honored by the visit of Mr. Premanand Shenoy, Managing Partner & Chief Consultant of Roy & Shenoy, who visited SBSL along with senior officials to deliberate on shipyard development schemes and long-term developmental policies. The interaction focused on strategic planning and future-oriented initiatives, further reinforcing SBSL's growth roadmap and commitment to sustainable expansion.

Ongoing Civil Work at SBSL

Telescopic Shed for slipway

The provision of a telescopic shed is a critical measure for mitigating environmental impacts such as noise and air pollution. The enclosed and movable structure effectively minimizes the dispersion of dust and particulate matter into the surrounding areas, thereby maintaining a cleaner and healthier environment. Furthermore, the sliding shed configuration improves overall yard productivity by enabling uninterrupted operations under varying climatic conditions. It facilitates continuous workflow during both day and night shifts, ensuring enhanced operational efficiency, worker safety, and material protection.

Stages of Work Execution

● Setting Out & Marking of Pile Coordinates

Precise setting out and marking of pile coordinates is fundamental to ensuring structural integrity, construction accuracy, cost efficiency, and successful project execution.

● Piling Works

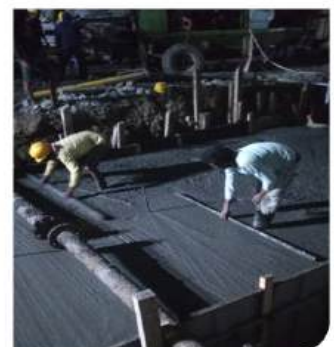

Piling works involve the installation of piles into the ground to transfer structural loads safely to deeper, stronger soil or rock strata. They are commonly used where surface soils are weak or where structures are subjected to heavy loads, marine conditions, or scour.

● Pile Load Tests

A pile load test is a field test carried out to evaluate the load-carrying capacity and performance of a pile under applied loads. It is one of the most reliable methods for confirming the adequacy of pile design and workmanship.

● Pile Cap

A pile cap is a thick reinforced concrete structural element constructed over a group of piles. Its primary function is to distribute the loads from the superstructure evenly to the piles and ensure they act together as a single foundation system.

North Yard Development to Accommodate Interceptor Boats:

It is essential to concrete the yard area to accommodate interceptor boats and enhance the company's overall operational capacity. A robust concrete yard provides a safe, worker-friendly environment while delivering long-term durability and sustainability. This reduces maintenance requirements and ensures consistent productivity throughout the facility's lifecycle. In addition, a concreted surface supports the safe and efficient movement of vehicles and machinery, and allows for the effective integration of drainage infrastructure and yard lighting systems, enabling reliable operations under all conditions.

Stages of Work Execution

● Earth Cutting & GSB Filling

The yard shall be brought to the required formation level, after which a 200 mm thick Granular Sub-Base (GSB) layer shall be provided to improve soil stability, ensure even load distribution beneath the surface, and achieve the specified finished level.

● Rolling & Compaction

The laid GSB shall be rolled and compacted using a 10-ton vibratory roller to ensure proper densification and uniform load-bearing capacity.

● Reinforcement Cement Concreting with Expansion Gaps

Reinforced cement concrete paving of 200 mm thickness shall be executed over the prepared and compacted Granular Sub-Base. The concrete shall be laid in 5 m × 5 m panels to control shrinkage and thermal movement. Expansion joints shall be provided between panels using 2 mm thick PVC boards, properly aligned and securely fixed in position prior to concreting. Proper compaction, finishing, and curing shall be ensured to achieve the required strength, durability, and long-term performance.

Celebrating Excellence – Reward & Recognition

The Management proudly recognizes employees who have completed one year with the organization, marking a milestone of dedication, consistent performance, and alignment with our values and work culture. We appreciate their contributions and look forward to supporting their continued growth and success.

Comprehensive Health Check-up Camp at SBSL

A medical camp was organized at SBSL, in collaboration with DOCA Medcity, exclusively for employees. The initiative, led by Dr. Ansal, Managing Director of DOCA Medcity, offered general medicine consultations, comprehensive eye examinations, and essential basic health screening services. The camp aimed to promote health awareness, early detection of potential health issues, and preventive care practices among employees.

Honouring: A Journey of Commitment & Service

Mr. V. Abubackar Shaffi, on behalf of the Management, extends heartfelt appreciation to Mr. P. K. Sivan on the occasion of his retirement, in recognition of his 13 years of dedicated service as a Security staff member. His commitment, discipline, and sense of responsibility have greatly contributed to maintaining a safe and secure work environment. We sincerely thank him for his loyal service and wish him good health, happiness, and a fulfilling life ahead.

Republic Day: Flag-Off Ceremony at SBSL

On the occasion of Republic Day, Mr. V. Abubackar Shaffi, Non-Executive Director of SBSL, led the flag-off ceremony, honoring India's constitutional values and democratic spirit. Conducted with dignity and reverence, the ceremony reflected respect for the nation's sovereignty, unity, and rule of law, and inspired employees to reaffirm their commitment to integrity, discipline, service, and responsible contribution to the nation's continued progress through shared purpose and collective responsibility and pride.

Expanding Our Footprint: Chennai Branch Opening

The Timber Pond registration process with the Indian Coast Guard and the formal opening of the Chennai branch were successfully conducted on 30th January 2026. This marks a significant step in strengthening our operational presence, enhancing regulatory compliance, and expanding our footprint beyond Kerala. The milestone reflects our continued commitment to growth, collaboration with statutory authorities, and long-term strategic development.

India Boat & Marine Expo 2026

M/s Seablue Shipyard participated in the 8th edition of the India Boat & Marine Show held from 29 to 31 January 2026 at the Bolgatty Palace Event Centre, Kochi. The shipyard was represented by Cdr. K. Rajesh Kumar (Retd), DGM (Operations). A Vendor Development Program (VDP) was conducted on 30th January 2026, featuring a B2B networking meet focused on vendor sourcing and development for various PSUs, including the Indian Navy, shipyards, ports, and other agencies, with emphasis on MSME products and services.

Employee of the month - Dec' 25

Employee of the Month

Chairman & Managing Director, Mr. Manoj Prabhu, Non-Executive Director Mr. V. Abubackar Shaffi, and Deputy GM Lt. CA Thomas (Retd.) recognized the Employee of the Month for December. Congratulations on achieving this milestone. Mr. Nitheesh Krishnan, Admin Manager, was recognized for his outstanding performance and valuable contribution.

Christmas Celebration at SBSL

SBSL celebrated Christmas in a joyful and festive spirit, bringing employees together to share moments of cheer, unity, and goodwill. The celebration reflected the values of togetherness, gratitude, and camaraderie that define our workplace culture. As the season of joy inspires reflection, the event highlighted the importance of teamwork, mutual respect, and shared success. SBSL extends warm Christmas wishes, hoping the festive season brings happiness, peace, and prosperity to all.

Blue Economy:

A Critical Driver of Infrastructure Development

Speaking at COMARSEM 2026 (Cochin Marine Seminar) in Kochi, Shyam Jagannathan, Director General of Shipping, said the blue economy has emerged as a powerful enabler of infrastructure growth, international competitiveness, and sustainable development, supporting the national vision of Viksit Bharat 2047.

He emphasized the critical role of the maritime sector in India's trade and logistics ecosystem, noting that more than 90% of the country's trade by volume is carried through sea routes. This highlights the sector's strategic importance in driving economic activity.

Jagannathan pointed out that India's maritime industry remains a cornerstone of economic progress, supported by a fleet exceeding 1,520 merchant vessels and a gross tonnage of over 13 million, significantly enhancing the nation's global shipping and maritime services presence.

He further noted that targeted initiatives across ports, shipbuilding, logistics, renewable energy, and allied maritime sectors are steadily strengthening India's position as a global leader in the blue economy.

Additionally, he highlighted government-led sustainability efforts, including waste-to-wealth initiatives through ship recycling to achieve global leadership, along with the development of green belts across at least 33% of port areas.

Source: The Hindu, Kochi

Flag-Off Differences:

Independence Day and Republic Day

Independence Day and Republic Day flag-off ceremonies differ in their purpose, authority, and the manner in which the National Flag is handled, each reflecting a distinct stage in India's national journey. Independence Day, observed on 15 August, commemorates India's liberation from British rule in 1947 and pays tribute to the sacrifices and struggles of countless freedom fighters. On this day, the Prime Minister hoists the National Flag at the Red Fort by raising it from below, symbolizing the birth of a free nation and the assumption of full political and administrative responsibility by its people.

Republic Day, celebrated on 26 January, marks the adoption of the Indian Constitution in 1950, signifying India's transformation into a sovereign, socialist, secular, and democratic republic governed by the rule of law. The ceremony is led by the President of India, the constitutional head of the nation, who unfurls the National Flag at Kartavya Path. Unlike hoisting, the flag is already tied at the top and is ceremonially opened, representing the authority of the Constitution and the continuity of democratic governance.

Republic Day is also distinguished by the grand ceremonial parade, showcasing India's military strength, cultural diversity, and constitutional values, while Independence Day focuses on reflection, remembrance, and renewal of national resolve. Thus, while both occasions celebrate national pride and unity, the distinction between hoisting and unfurling the National Flag underscores their unique historical, symbolic, and constitutional significance in India's democratic framework.

Happy Birthday to our **Amazing Team**

Sea Blue Shipyard extends its warmest wishes to all employees celebrating their birthdays in Dec and Jan. We appreciate your hard work and dedication, and wish you a year ahead filled with health, happiness, and continued success!
