Message from the Chairman & Managing Director

Dear Stakeholders,

As we conclude the last quarter of the financial year, Sea Blue Shipyard Limited (SBSL) reflects on a period of strong performance, resilience, and meaningful progress. I am pleased to share that we will achieve a turnover of above ₹50 crore (2025–2026), marking an important milestone in our growth journey and reinforcing our financial strength with net profit above ₹10 crore.

A key highlight of this quarter has been the successful undocking of INS Kabra, marking a major operational milestone for SBSL. This achievement reflects our growing capability in handling complex naval refits with precision and confidence. Concurrently, work is progressing steadily on ICGS Abhinav and the private vessel Ubaidulla. Looking ahead, upcoming projects including ICGS Amartya, ICGS C-441, and WB Ambuda are set to further strengthen our order book and operational momentum.

I extend my sincere appreciation to all our employees, stakeholders, and partners whose dedication and support continue to drive our success.

During this quarter, SBSL also achieved the successful and timely completion of ICGS Savitribai Phule, demonstrating our commitment to execution excellence and delivery discipline.

Our strategic expansion initiatives have begun to yield tangible outcomes. The Chennai branch and operations at the Timber Pond slipway have enabled us to establish a presence in the Eastern maritime corridor, including securing technical registration for Coast Guard refits in the region. At the same time, capacity enhancement efforts in the Western region are positioning SBSL for increased vessel intake and improved scalability.

Infrastructure development remains a priority, with ongoing initiatives including yard development, construction of a telescopic slipway shed, equipment upgrades, and strengthening of safety systems—ensuring a robust and future-ready operational framework.

As part of our ongoing stakeholder engagement, a review meeting was conducted with Capt. Ahmed Rafiq, Commodore George Mathai, and Commodore Aravind Chari to assess the technical progress of INS Kabra, further strengthening coordination and alignment with naval requirements.

Additionally, we had constructive review discussions with Cmde. Varghese Mathew, ensuring continued alignment with operational standards and expectations.

As we close this financial year, our focus remains firmly on achieving a ₹150 crore top line in FY 2026–27 while steadily progressing towards our long-term aspiration of becoming a ₹1000 crore enterprise by 2030.

Manoj Prabhu

Chairman & Managing Director
Sea Blue Shipyard Limited

Message from Deputy General Manager (Business Devt.)

Sea Blue Shipyard Limited (SBSL) continues to move forward with purpose, resilience, and a clear strategic vision, reinforcing its emergence as a key contributor to India's maritime and defence ecosystem. Guided by our CMD's Vision 2030, we are not only strengthening our operational capabilities but also redefining our role as a future-ready shipyard aligned with national priorities.

The defining highlight of this period has been the ongoing major refit of INS Kabra, a prestigious and high-value project for the Indian Navy. SBSL has successfully executed two critical undocking evolutions, with the vessel recently undocked—a significant operational achievement in itself. The balance afloat works are progressing at pace and are on track for completion, with delivery to NSRY scheduled within the next two weeks. This project represents more than execution excellence; it reflects SBSL's transition into handling complex, large-scale naval platforms with confidence and precision.

Our strategic expansion into the Eastern maritime corridor is now translating into measurable outcomes. The Chennai branch, established as part of our growth roadmap, has enabled SBSL to secure technical registration for refits of Eastern region vessels of the Indian Coast Guard—an important breakthrough in expanding our geographic footprint. In parallel, ongoing capacity enhancement initiatives aimed at increasing vessel intake from the Western region are positioning SBSL for higher throughput and operational scalability. These initiatives are integral to achieving our targeted growth and revenue milestones.

Operational momentum continues with the commencement of the refit of ICGS Abhinav, including the dispatch of its three main engines to MTU, Pune, for major 12K overhauls. Further strengthening our order book, SBSL has secured four 04 confirmed refit orders from the Indian Coast Guard and two 02 from the Indian Navy, all slated for execution in the coming months. This robust pipeline ensures continuity, stability, and sustained growth.

At SBSL, progress is not measured solely in completed projects, but in the confidence, we build, the capabilities we enhance, and the vision we pursue. With continued investments in infrastructure, process excellence, and a skilled workforce, we are steadily advancing towards our CMD's aspiration of transforming SBSL into a ₹1000 crore enterprise by 2030.

Lt CA Thomas (Retd)

Deputy General Manager (Business Development)
Sea Blue Shipyard Limited

Message from Deputy General Manager (Operations)

The months of February and March 2026 have been marked by intense operational activity and significant milestones at Sea Blue Shipyard. Our teams have continued to demonstrate resilience, adaptability, and technical competence while handling multiple complex refit and repair assignments simultaneously. The spirit of teamwork and commitment to delivery, despite operational challenges, has been a defining feature of this period.

A major highlight has been the extensive underwater repair work undertaken for INS Kabra while on the slipway. The project involved large-scale and technically demanding underwater interventions, all of which were executed with precision and strict adherence to quality and safety standards. The successful completion of both versions of docking stands as a testament to the meticulous planning and coordinated execution by all departments involved.

Parallely, steady progress has been achieved in ongoing projects. The underwater work of Ubaidulla is now nearing completion, reflecting consistent effort and focused execution by the teams. Each stage of the work has been carried out with due diligence, ensuring readiness for subsequent operational requirements.

On the infrastructure front, the development of the North Yard has been successfully completed, enhancing the shipyard's capability to undertake repairs of Coast Guard Interceptor Boats. This development marks an important step in expanding our operational capacity and readiness to support future requirements of our valued defence customers.

Another significant development during this period has been the commencement of the refit of Coast Guard Ship Abhinav. A key milestone achieved was the smooth and efficient removal of all three main engines from the vessel, followed by their safe dispatch to MTU Pune for routine overhaul. The seamless execution of this critical activity reflects the high level of coordination and technical expertise within the team.

Looking ahead, the shipyard is geared up for the forthcoming refits of Coast Guard Ships Amartya and C-441. Preparatory activities are underway, and we look forward to commencing these projects with the same level of professionalism and commitment that defines our operations.

I take this opportunity to appreciate the excellent teamwork displayed by all personnel and stakeholders. By maintaining this momentum and collaborative approach, Sea Blue Shipyard will continue to strengthen its reputation as a dependable and capable ship repair partner.

K. Rajesh Kumar

Message from AGM

Dear Team

I am honored to join Sea Blue Shipyard Limited as Assistant General Manager- Finance in March 2026. I am a chartered Accountant with 19 years of post-qualification experience in Finance and Audit at multiple industries both in India and abroad.

I feel very proud to be part of such an esteemed organization since it has immense potential in shareholders wealth maximization and at the same time support in nation building.

As India plans to be in the top 5 global ship building nation by 2047, we have enormous opportunities to develop our business through strategic planning and execution.

As we are approaching the year end of 2025-26, We expect to have a top line revenue of more than 50 crores which is more than double the turnover we had in 2024-25. We expect to have a net profit of more than 20% of turnover. This is clear indication of the company's growth in line with managements vision for 2030.

In order to cater the growing demand and safer work environment, our company aims to invest in new infrastructure facilities like the telescopic slipway and development of north yard.

Operational efficiency and cost control mechanisms are integral part of profit maximization. In order to achieve this goal, we are committed to maintain optimum operational cost. We have started the installation of 135 kwp roof top solar facility. This will reduce our energy consumption cost to a great extend next year.

"Indian ocean is the only ocean named after a country. Let our dreams be as big as our ocean."

Wishing you all the very best

Dhanjit Paul
AGM – Finance

Message from Human Resource Manager

In an industry defined by precision, resilience, and innovation, our Shipyard continues to stand as a symbol of excellence and national pride. Each milestone we achieve is not merely the result of advanced infrastructure or technology, but the collective commitment, skill, and integrity of our people.

At the heart of our progress lies a strong human resource philosophy – one that values capability building, inclusivity, and continuous learning. As we navigate an increasingly dynamic maritime landscape, investing in our workforce remains a strategic priority. From structured training programs to leadership development initiatives, we are consistently working to equip our employees with the competencies required to meet global standards.

Safety and well-being continue to be integral to our operations. We are reinforcing a culture where safety is not just compliance, but a shared responsibility embedded in every action and decision. Equally, we are committed to fostering a workplace that promotes mutual respect, collaboration, and a sense of belonging among all employees.

Over the past months, we have witnessed commendable efforts across departments – be it in executing complex projects, maintaining operational excellence, or driving innovation. Such achievements reflect the dedication and professionalism that define our organizational ethos.

As we move forward, our focus will remain on strengthening employee engagement, enhancing productivity through digital and process transformation, and nurturing future-ready talent. Together, we will continue to build not just vessels, but a legacy of trust, reliability, and excellence.

I extend my sincere appreciation to every member of our Shipyard fraternity for their unwavering contribution. Let us continue to strive, excel, and set new benchmarks for the industry.

Warm regards,

Sreekumar P.S.

Head – Human Resource
Sea Blue Shipyard Ltd.

Insights from Production

The production department continues to demonstrate strong and consistent operational performance, effectively managing a wide spectrum of ship repair and engineering fabrication activities. Our continued focus on timely delivery, technical excellence, and strict adherence to the highest safety standards remains central to our operations. This report presents a summary of major projects currently in progress, recently completed, and upcoming at the yard.

Ship Repair Projects

1 ICGS Abhinav – Fast Patrol Vessel

Owner: Naval Ship Repair Yard

Work Done: Short Refit

Work Period: 10 Feb 2026 to 07 Sep 2026

Completion Status: 20% Completed

ICGS Abhinav is a 50-meter fast patrol vessel with a displacement of 290 tonnes, commissioned on 16 January 2014. It is the third in a series of 20 FPVs designed and built by Cochin Shipyard Ltd. The vessel is capable of high-speed interception, surveillance, and search and rescue operations, with a maximum speed of up to 33 knots.

The major scope of work includes W6 routines of three main engines, five-yearly waterjet routines, and ten-yearly A5 routines of gearboxes. Additional works include shafting, pipeline and valve maintenance, and underwater painting.

The lifting, packing, and transportation of all three main engines were successfully completed on 09 Mar 2026 under the supervision of the OEM (MTU) representative. Docking of the vessel is planned on 30 Mar 2026. Simultaneously, all feasible afloat works not related to underwater activities have been initiated.

2 INS Kabra – High-Speed Patrol Vessel

NS Kabra is a 49-meter, 320-ton high-speed patrol vessel built by GRSE, Kolkata, and commissioned on 08 June 2011. The vessel is designed for anti-piracy, patrol, and search and rescue operations within India's Exclusive Economic Zone and is equipped with advanced waterjet propulsion systems.

This is the first medium refit of INS Kabra. SBSL previously completed the short refit of INS Kalpeni, its sister vessel, in 2022. The total refit duration is 180 days, with 90 days at SBSL and the remaining at NSRY.

Major works include ABER item replacements, underwater and above-water hull plate renewals, underwater painting, habitability upgrades, ventilation trunking works, and renewal of pipelines and valves.

As of date, all underwater routines have been completed, including both docking and undocking operations. Underwater compartment painting and approximately 12 tonnes of plate renewal have been completed. Parallel progress has been achieved in above-water works such as deck and superstructure plate renewals. All related underwater mechanical and electrical works, including valves, ICCP systems, and echo sounder, have also been completed. The remaining works are progressing as planned, with a commitment to timely completion and delivery to NSRY.

In addition to the extensive structural and mechanical overhauls, the refit emphasizes the modernization of the vessel's internal systems to ensure peak operational readiness. Technical teams are currently focusing on the calibration of the advanced waterjet propulsion units and the integration of upgraded navigational electronics. Quality assurance inspections are being conducted at every stage to meet the stringent standards required by the Indian Navy. With the underwater phase successfully concluded, the project has transitioned into its final stage of internal outfitting and sea trials, keeping SBSL on track to return the vessel to active duty within the stipulated 180-day timeline.

Owner: Naval Ship Repair Yard (NSRY)

Scope of Work : Medium Refit

Work Period:

1. 6 Jan 26 to 6 Apr 26 90 days @ SBSL

2. 6 Apr 26 to 6 July 26 90 days @ NSRY

3. Total 180 days from 6 Jan 26 to 6 July 26

Completion Status: 80% Completed

3 MV Ubaidhulla – General Cargo Vessel

MV Ubaidhulla is a general cargo vessel previously operated under the Union Territory Administration for service to the Lakshadweep islands. The vessel has now been taken over by A&N Logistics for operations in the Andaman and Nicobar islands.

The scope of work includes overhauling of underwater valves, propeller shaft and rudder works, underwater plate renewals, tank cleaning and painting, and underwater painting. The vessel was docked using SBSL's balloon docking facility.

As of date, approximately 80% of the total work has been completed, including rudder and propeller works, underwater valve maintenance, and about 90% of underwater plate renewal activities.

Owner: A&N Logistics

Scope of Work : Underwater Routines

Work Period: 13 Nov 2025 to 13 Feb 2026

Completion Status: 80% Completed

Conclusion

The production department remains committed to maintaining high standards of efficiency, quality, and safety across all ongoing and upcoming projects.

With structured planning and coordinated execution, all projects are progressing in line with the scheduled timelines, ensuring timely delivery and client satisfaction.

Project Testimonials

Sea Blue Shipyard Ltd. successfully executed the Special Work Package (ERDD) for ICGS Savitribai Phule. The yard's overall performance was highly satisfactory.

Certification – Shipyard Association of India

Sea Blue Shipyard Pvt Ltd has officially taken membership with the Shipyards Association of India (SAI) for 2026. As a member of this premier national body, we remain committed to driving innovation and excellence within India's shipbuilding and maritime infrastructure sector.

Highlights of the Month

Driving Excellence: CMD Meets ASY Kochi

On February 25, 2026, SBSL CMD Mr. Manoj Prabhu met with Rear Admiral Rajneesh Sharma, Admiral Superintendent of the Yard (ASY), at NSRY, Kochi. The high-level discussion focused on reviewing the technical progress of the INS Kabra refit and strengthening the strategic partnership between SBSL and the Indian Navy. Ensuring the timely delivery of mission-ready assets through streamlined collaboration and naval engineering expertise.

Strategic Maritime Collaboration at NSRY Kochi

SBSL leadership, including CMD Mr. Manoj Prabhu, Lt. CA Thomas (Retd), and Mr. K. Rajesh Kumar, met with Rear Admiral Rajneesh Sharma (ASY) and Cmde. George Mathai at the Naval Base, Kochi. The meeting focused on strengthening operational synergy and maritime collaboration between SBSL and the Indian Navy.

Weekly review of INS Kabra refit by GM NSRY

The General Manager of NSRY, Kochi, Cmde. Arvind Chari recently conducted a detailed weekly review of the INS Kabra refit currently underway at our yard. The session focused on monitoring critical technical milestones, ensuring strict adherence to quality compliance, and maintaining the project timeline. This consistent oversight highlights the seamless coordination between SBSL and the Indian Navy.

Visit of CLOGO, HQSNC to Sea Blue Shipyard

On February 12, 2026, the Chief Logistics Officer (CLOGO) of Headquarters Southern Naval Command (HQSNC) visited Sea Blue Shipyard to oversee the logistical support framework for ongoing naval projects. The visit included a comprehensive review of material procurement and supply chain coordination essential for the INS Kabra refit.

Surface Preparation of Superstructure: INS Kabra

As a critical phase of the ongoing refit, SBSL has commenced the extensive surface preparation of the INS Kabra's superstructure. This process involves meticulous descaling and abrasive cleaning to ensure a pristine substrate for specialized marine coating applications. By employing high-standard surface treatment techniques, the team is effectively removing aged layers and corrosion, providing the necessary profile for superior paint adhesion.

Bridging global technology with local expertise

Mr. Martin Lawrence serves as the General Manager at BERG, a global powerhouse in the maritime industry renowned for its pioneering work in ship propulsion, control, and steering technology. With a career spanning decades in naval architecture and marine engineering, Mr. Lawrence has become a key figure in driving technical innovation and operational efficiency across international waters.

Mock Fire Drill Onboard INS Kabra

On February 5, 2026, a comprehensive mock fire exercise was conducted onboard INS Kabra at Sea Blue Shipyard. The drill simulated a high-pressure emergency scenario to evaluate the rapid response capabilities of the fire-fighting teams and the integration of onboard safety systems, maintaining the highest standards of safety and operational readiness throughout the refit duration.

Pooja Ceremony of ICGS Abhinav

Sea Blue Shipyard recently marked the official commencement of the ICGS Abhinav Short Refit with a traditional pooja ceremony at the yard. The event, which invokes blessings for a safe and successful project, saw active participation from Mr. K. Rajesh Kumar, DGM Operations, alongside senior production teams and Indian Coast Guard officials.

Industrial Visit: Srinivas Institute of Technology

On March 5, 2026, Sea Blue Shipyard hosted 43 Marine Engineering students and two faculty from Srinivas Institute of Technology, Mangalore. The visit provided practical insights into ship repair and dry-docking operations. By observing real-world workflows, students bridged the gap between academic studies and technical complexities of the maritime industry.

Strengthening Emergency Medical Infrastructure

At Sea Blue Shipyard, the safety and well-being of our workforce, subcontractors, and naval partners remain our highest priority. To further strengthen our emergency response framework and ensure a "Zero Harm" working environment, SBSL has officially inducted a state-of-the-art Advanced Life Support (ALS) ambulance into the yard's permanent medical unit.

Visit to Timber Pond by CMD Manoj Kumar prabhu meeting DIG Nishanth Nair, During his visit.

During a recent tour of the Chennai branch, CMD Manoj Kumar Prabhu visited the historic Timber Pond to review ongoing maritime projects and infrastructure capabilities. A key highlight of the visit was a productive sit-down with DIG Nishanth Nair.

This visit underscores SBSL's proactive approach to leadership—stepping onto the field to ensure that our commitment to maritime excellence is reflected across every branch.

ICGS Abhinav Successfully Docked for Short Refit

Sea Blue Shipyard (SBSL) is pleased to announce the successful docking of the Indian Coast Guard Ship, ICGS Abhinav, on March 31, 2026. This milestone follows the traditional pooja ceremony held earlier this month to invoke blessings for the project's success. With the vessel now precisely positioned at our facility, the scheduled Short Refit has officially commenced, reinforcing SBSL's commitment to maintaining the operational excellence of the Indian Coast Guard fleet.

Inspection of cradle works and telescopic sheds

Mr. Ramesh Prabhu, director SBSL recently conducted a detailed site inspection of the ongoing infrastructure upgrades at the yard, specifically focusing on the cradle works and the installation of the new telescopic sheds. During the visit, he reviewed the structural integrity of the cradles and the progress of the telescopic shed foundations. These sheds are a strategic addition to our facility, designed to provide an all-weather working environment that ensures project timelines remain unaffected by seasonal changes. This oversight highlights our leadership's commitment to modernizing the yard's capabilities.

CSR fund distribution to Sree Sudheendra Medical Mission

As part of our ongoing commitment to Corporate Social Responsibility (CSR), Sea Blue Shipyard recently organized a fund distribution ceremony at Sree Sudheendra Medical Mission. The initiative was led by our Assistant General Manager (AGM) and the Head of HR, representing the company's dedication to community welfare. The contribution is aimed at enhancing the hospital's medical infrastructure and supporting affordable healthcare services for the underprivileged. Ensuring that quality medical care is accessible to those in need.

Ongoing Civil Work at SBSL

Telescopic Shed for slipway:

The installation of a telescopic shed serves as an essential solution for reducing environmental concerns, including noise and air pollution. Its enclosed and adjustable design helps contain dust and airborne particles, preventing their spread to nearby areas and contributing to a healthier environment. Moreover, the movable shed system boosts yard efficiency by allowing operations to continue smoothly despite changing weather conditions. It enables round-the-clock activities, improving productivity, ensuring worker safety, and safeguarding materials from external elements.

Current Status:

The foundation work for the telescopic shed has been temporarily suspended to maintain smooth and disruption-free yard operations, in line with the requirements of Naval personnel. SBSL recommenced the work on end of March, with the foundation expected to be completed by mid-April.

Fabrication activities have been fully completed, and the delivery of materials is underway. Once the foundation work is finalized, erection will begin without delay, with overall project completion anticipated within a further 45-day period.

Happy Birthday to Our Amazing Team

Sea Blue Shipyard extends its warmest wishes to all employees celebrating their birthdays in Feb and Mar. We appreciate your hard work and dedication, and wish you a year ahead filled with health, happiness, and continued success!

Birthday in February 2026

Mr. C. A Thomas

Mr. Nitheesh Krishna

Mr. Mohammed Abu Thahir

Employee Recognition

Celebrating the hands and minds that keep us moving forward! Throughout February and March, the team members featured here have demonstrated exceptional initiative and a true spirit of collaboration. We celebrate your contributions to our shared goals. And thank you for the energy and expertise.

Employee of the Month

Mr. Rahulverma

Sea Blue Shipyard is proud to announce Mr. Rahulverma as our Employee of the Month for February 2026.

On February - 2026

Mr. Lenin Lal

Mrs. Preethi Rajan

Ms. Akshaya Praveesh

Ms. Krishna Priya

Management Support for Mr. Sijo David

Sea Blue Shipyard Management is committed to the well-being of our team members. Following his recent accident, the company has been actively assisting Mr. Sijo David to ensure he receives the necessary care and support during this time.

Employee of the Month

Mr. Saineesh

Sea Blue Shipyard is proud to announce Mr. Saineesh as our Employee of the Month for March 2026.

On March - 2026

Mr. Emil Scaria Eldhose

Mr. Vipin V

Mr. Arun Andrews

Mr. Jishnu K E

Mr. Abiram Sunil

Mr. Ebrahim Sheik

Our New Joiners

A warm welcome to our newest team members! We are thrilled to have fresh talent joining Sea Blue Shipyard. Your unique skills and perspectives are exactly what we need to continue our journey toward new successes. We look forward to the great work we'll achieve together and are excited to see you thrive in our community. Welcome aboard!.
