Message from the Chairman & Managing Director

Dear Stakeholders,

As we commence the first quarter of the financial year 2026-27, I am pleased to reflect on the strong momentum with which Sea Blue Shipyard Limited (SBSL) has entered this new phase of growth and transformation. For Q1 of FY 2026-27, the Company expects to achieve a turnover of ₹15.84 crore, reflecting a strong start to the financial year and reinforcing our confidence in meeting the growth targets set for the year ahead.

Over the past few months, SBSL has continued to demonstrate its growing stature in India's maritime and defence sector through the successful execution of several critical projects and technical achievements.

One of our most significant recent achievements is the successful completion of the underwater refit package for INS Kabra. Following major repairs, the vessel was undocked and handed over to NSRY for afloat works. As one of the highest-value projects in SBSL's history, this prestigious Indian Navy assignment highlights our growing capability to execute complex naval refits with precision, quality, and strict schedule adherence.

In another landmark achievement, SBSL executed Kochi's first tandem method docking for ICGS C-441, earning high appreciation from the Indian Coast Guard, Naval Headquarters, and private shipyards. Meanwhile, work progresses steadily on the private vessel Ubaidulla and ICGS Abhinav, where other major refit activities have commenced—including transporting its engines to MTU, Pune, for a 36-month overhaul. Recent project review visits by senior officials, including DIG Vinod Sakharkar, CSO (Tech), and DIG Gaurav Sinha, GPRS, reflect the growing stakeholder confidence in our technical capabilities, while upcoming projects like ICGS Amartya and WB Ambuda continue to strengthen our pipeline.

We have also successfully completed the emergency refit of Tug Buland in a record time of 15 days, demonstrating our team's capability to execute critical projects within demanding timelines. In addition, Ambudha, an Indian Navy water base vessel, has arrived for refit work. The project is presently underway and progressing as planned. Additionally, we are pleased to announce that our balloon docking facility is now fully operational with the arrival of a new balloon from China. Private vessels Amindevi and Minicoy are currently awaiting docking at the facility.

To strengthen industry collaboration, SBSL leadership visited key partners including Samudrika Shipyard, Praga Marine, Puthenpurackal Boat Yard, Lawrence Mestary Boat Yard, and LDCL. Solidifying our Coast Guard engagement, contracts for ICGS C-441 and ICGS Amartya were formally signed with DIG Shashi Bhushan, CSO (Refit), at Regional Headquarters Mumbai. Meanwhile, our Eastern region expansion progresses well, with our Chennai branch and Timber Pond slipway securing technical registrations. Concurrently, yard upgrades, a telescopic slipway shed, and equipment modernization continue building a future-ready ecosystem for larger naval assignments.

To ensure alignment with naval operational standards, detailed review meetings were conducted with senior officials, including Capt. Ahmed Rafiq Cmde George Mathai, Cmde Aravind Chari, and Cmde Varghese Mathew. Backed by a strong operational pipeline and expanding regional footprint, SBSL is moving steadily toward our target of a ₹ 150 crore top line for FY 2026-27, while confidently progressing toward our vision 2030 of becoming a ₹1000 crore enterprise.

I extend my sincere gratitude to all employees, customers, stakeholders, and partners whose dedication, trust, and continued support remain the driving force behind SBSL's success and future growth.

Manoj Prabhu

Chairman & Managing Director

Sea Blue Shipyard Limited

Message from Deputy General Manager (Business Devt.)

Sea Blue Shipyard Limited (SBSL) continues to advance with strategic clarity, operational excellence, and an unwavering commitment towards our CMD's Vision 2030. The past two months have been marked by significant milestones, technical achievements, and –

strengthened partnerships, reinforcing SBSL's growing position in India's maritime and defence sector.

A defining highlight of this period has been the prestigious Indian Navy project INS Kabra. SBSL successfully completed the underwater refit package, following which the vessel was undocked and handed over to NSRY for continuation of afloat works. This major repair project, one of the highest-value assignments undertaken in SBSL's history, reflects the shipyard's evolving capability to execute complex naval refits with precision, professionalism, and schedule adherence.

Another notable milestone was the successful tandem method docking of ICGS 441, the first docking operation of its kind executed in Kochi. The successful completion of this innovative methodology earned appreciation from both Indian Coast Guard and Indian Naval Headquarters, and even from private shipyards adding another technical achievement to SBSL's growing portfolio.

As part of our business development initiatives, SBSL leadership visited Samudrika Shipyard, Praga Marine, Puthenpurackal Boat Yard, Lawrence Mestary Boat Yard, and Lakshadweep Development Corporation Limited to strengthen industry collaboration and explore future opportunities. SBSL also signed contracts for ICGS 441 and ICGS Amatya with DIG Shashi Bhushan, CSO (Refit), at Regional Headquarters Mumbai.

Our Chennai branch continues to support the strategic expansion into the Eastern region. Registration at Timber pond of Indian Coast Guard vessels are received, while proposals for further capacity enhancement of additional Coast Guard vessels at SBSL are also under consideration.

Operationally, SBSL has commenced the refit of ICGS Abhinav, including lifting and transportation of its engines to MTU, Pune, for scheduled 36-month major overhauling. Senior officials including DIG Vinod Sakharkar, CSO (Tech), and DIG Gaurav Sinha, Coast Guard Refit and Production Superintendent, visited SBSL to analyse the ongoing refit activities, reflecting growing stakeholder confidence in our capabilities.

With multiple confirmed projects and a strong operational pipeline, SBSL continues to move steadily towards achieving our CMD's vision of transforming SBSL into a ₹1000 crore enterprise by 2030.

Lt CA Thomas (Retd)

Deputy General Manager (Business Development)
Sea Blue Shipyard Limited

Message from Deputy General Manager (Operations)

The months of April and May 2026 have been marked by significant operational achievements and steady progress across multiple refit and repair projects at Sea Blue Shipyard. Our teams have continued to demonstrate professionalism, technical competence, and unwavering commitment while handling demanding assignments simultaneously.

A major highlight during this period has been the successful completion of the underwater scope of work of INS Kabra. The work undertaken was unprecedented in nature and executed with exceptional quality standards, reflecting the capability and dedication of our workforce.

The underwater refit activities of INS Abhinav are also progressing steadily. Important milestones, including completion of waterjet routines, are being carried out systematically as part of the ongoing work package. Another proud achievement has been the maiden docking of IB 441 at our newly developed North Yard facility through tandem lifting operations. This marks an important milestone in enhancing the shipyard's operational capability, and the refit of the vessel is progressing well.

The refit work of the private vessel Ubaidula is nearing completion and the vessel is likely to be undocked shortly. In addition, Indian Navy Tug Buland, which had arrived for ship-side and superstructure painting along with important repair works including boat davit activities, has been successfully completed and handed back to the Indian Navy in quick time.

Indian Navy Yard Craft Water Barge Ambuda is presently undergoing a short refit in the yard. Afloat jobs are in progress and the vessel is planned for balloon docking after undocking of Ubaidula.

I am extremely proud of our production team, especially the young engineers and workforce, who continue to work tirelessly day and night to ensure timely completion of all projects with the highest standards of quality and professionalism.

K. Rajesh Kumar

DGM (Operations)
Sea Blue Shipyard Ltd.

Message from AGM

Dear Stakeholders,

As we embark the new financial year 2026-27 with confidence, I am delighted to inform that we have achieved a turnover of more than 50 crore in 2025-26 with more than 20% Net profit.

During the current quarter, we expect a billing of Rs. ₹15.84 Cr which will be more than the Q1 billing in 2025-26. We have a total expected billing of 60 Cr for the year 2026-27 based on confirmed orders till date. This will definitely increase in the coming quarters and is expected to reach 100 crores.

I would like to thank our CMD and top management for their relentless efforts in this achievement. We are committed to reduce the operational cost by stringent negotiations with service providers and suppliers. The operational department is committed to complete each work within planned timeline and cost. The solar installation will be completed by end of May which will reduce the power consumption cost.

The docking of interceptor boat C441 of coast guard was a great success during this period. This helped us to gain the confidence of Coast guard in getting refit works of more interceptor boats. On the Capex side, we are planning to develop the north yard and build a Gantry crane to enable the service of multiple interceptor boats at a time. The telescopic shed for the slipway is under construction. A vessel sliding facility will be added to the existing slipway. Both this facility will enable us to secure further orders from Navy and coast guard and increase our revenue for next year.

We are approached by various banks and financial institutions for funding the working capital and capex requirement and they have shown a great confidence in our company. We shifted to the new office building by end of May. This will help in better operational efficiency and inter department coordination. Also, the old building will be utilized as office space for navy and coast guard after minor renovations.

"An investment in knowledge pays the best interest." Hence, we are committed to enhance our business knowledge and thereby maximize the wealth of the stakeholders.

Thank You and Best regards.

Dhanjit Paul
AGM – Finance

Message from Human Resource Manager

Dear Colleagues,

It brings me immense pleasure to connect with each of you through this edition of our magazine. Every milestone achieved by our organization is a reflection of the dedication, resilience, and collective spirit of our employees.

A public limited shipyard of our stature does not run merely on steel, technology, or machinery; it runs on the passion, grit, and collective heartbeat of our people. Every vessel we construct and repair is a testament to your unwavering dedication. As we strengthen our position in the maritime industry, our goal is clear: to build a transparent, system-driven ecosystem rooted in mutual trust. While robust structures give us the foundation to scale, it is our shared values and workplace culture that breathe life into them.

Our shipyard is a living ecosystem where expertise, teamwork, and discipline unite. Every contribution—from the shop floor and design offices to sea trials and administration—is essential to our journey. A strong organization relies on a two-way bridge; your hard work is noticed and deeply valued. In turn, management is fully committed to ensuring a safe, supportive, and growth-oriented environment. When you grow, the shipyard grows, paving the way for a secure and rewarding future for us all.

In today's rapidly evolving environment, we grow stronger when we are connected by a common purpose. We remain committed to fostering a culture built on mutual respect, transparency, collaboration, and continuous learning. I encourage our shipyard family to take pride in both our work and our core values—integrity, professionalism, safety, innovation, and excellence. Together, let us support one another, celebrate our wins, and face challenges with confidence and unity.

This magazine serves as a wonderful platform to showcase the talent, creativity, achievements, and stories of our employees. I hope it continues to strengthen communication, inspire fresh ideas, and deepen the sense of belonging among all of us. As we move forward together, let us remember that the strength of any organization lies in the strength of its people and the spirit that binds them together.

Wishing you and your families good health, happiness, and continued success.

Warm regards,

Sreekumar P.S.

Head – Human Resource
Sea Blue Shipyard Ltd.

Insights from Production

Introduction

The Production Department continues to demonstrate strong and consistent operational performance through the efficient execution of ship repair, refit, and engineering fabrication projects. Our commitment to timely delivery, technical excellence, quality workmanship, and strict adherence to safety standards remains the cornerstone of all operations. This report provides an overview of major projects currently under execution, recently completed assignments, and upcoming projects scheduled at the yard.

Ship Repair Projects

The Production Department continues to demonstrate strong and consistent operational performance through the efficient execution of ship repair, refit, and engineering fabrication projects. Our commitment to timely delivery, technical excellence, quality workmanship, and strict adherence to safety standards remains the cornerstone of all operations. This report provides an overview of major projects currently under execution, recently completed assignments, and upcoming projects scheduled at the yard.

ICGS Abhinav – Fast Patrol Vessel

Item	Details
Owner	Indian Coast Guard
Scope of Work	Short Refit
Work Period	10 Feb 2026 – 07 Sep 2026
Completion Status	60% Completed

The major scope of work includes W6 routines of three main engines, five-yearly routines of waterjets, and ten-yearly A5 routines of gearboxes. Additional activities include shafting works, pipeline and valve maintenance, underwater steel renewal, and underwater painting. The lifting, packing, and transportation of all three main engines have been completed. Overhauling of the engines has been completed, and OEM trials are currently in progress at Pune. Lifting of all three gearboxes and alternators has been completed, and overhaul activities are in progress. Docking operations and five-yearly waterjet routines have been successfully completed. Underwater steel renewal has been completed, and painting activities are currently underway. Maintenance of pumps, valves, and pipelines is progressing as planned. Undocking of the vessel is tentatively scheduled for 10 June 2026.

INS Kabra – High- Speed Patrol Vessel

Item	Details
Owner	Naval Ship Repair Yard(NSRY)
Scope of Work	Medium Refit
Work Period	17 Dec 2025 – 15 Jul 2026
Completion Status	90% Completed

This is the vessel's first Medium Refit. SBSL previously completed the Short Refit of its sister vessel INS Kalpeni in 2022. The total refit duration is 180 days, comprising 90 days at SBSL and the remaining period at NSRY. Major works include ABER item replacements, underwater and above-water hull plate renewals, underwater painting, habitability upgrades, ventilation trunking works, and renewal of pipelines and valves. All underwater routines, including docking and undocking operations, have been successfully completed. Underwater compartment painting and approximately 14 tonnes of steel plate renewal have been completed. Following successful undocking, the vessel was shifted to NSRY for completion of balance works. Alignment of the three main engines, gearboxes, and waterjets has been completed. Habitability improvements and final-stage activities are currently in progress.

MV Ubaidulla – General Cargo Vessel

Item	Details
Owner	A&N Logistics
Scope of Work	Underwater Routines
Work Period	13 Nov 2025 – 13 June 2026
Completion Status	90% Completed

MV Ubaidulla is a general cargo vessel. Previously operated by the union territory administration for transportation services to the Lakshadweep Islands. The vessel is now operated by A&N Logistics for service in the Andaman and Nicobar Islands. The scope of work includes overhauling of underwater valves, propeller shaft and rudder maintenance, underwater steel renewals, tank cleaning and painting, and underwater hull painting. The vessel was docked using SBSL's Balloon Dock Facility.

Approximately 90% of the total work has been completed. Major activities, including rudder and propeller works, underwater valve maintenance, and underwater steel renewal, have been completed. Final underwater painting activities are currently in progress and are expected to be completed within the next five days, following which the vessel will be undocked.

Tug Buland – A Tug Boat

Item	Details
Owner	Indian Navy
Scope of Work	General Repair Works
Work Period	21 Apr 2026 – 21 May 2026
Completion Status	100% Completed

The scope of work included overhauling of the boat davit, deck and superstructure painting, tyre fender renewal, and various modifications required prior to the vessel's future deployment. All planned activities were completed successfully within the scheduled timeframe, and the vessel was delivered on schedule

ICGS C-441 – Interceptor Boat

Item	Details
Owner	Indian Coast Guard
Scope of Work	General Repair Works
Work Period	02 May 2026 – 13 Jun 2026
Completion Status	80% Completed

The major scope of work includes 36-monthly routines for the main engines, waterjet maintenance, underwater hull painting, steel renewal, and mechanical works. This project marked significant milestones for SBSL, highlighted by the vessel's successful docking using a tandem crane lifting arrangement—a first for the yard. Additionally, a version change of the vessel was executed for the first time at SBSL using an innovative screw-jack lifting system. These unique methods demonstrate the feasibility of future infrastructure upgrades, such as a proposed EOT crane to handle multiple vessels simultaneously.

Currently, the 36-monthly waterjet routines are complete. Underwater painting and steel renewal are approximately 80% finished, while pipeline, motor, pump, and related mechanical works remain in progress.

WB Ambuda – Water Barge

Item	Details
Owner	Indian Navy
Scope of Work	SR-25
Work Period	16 May 2026 – 13 Jul 2026
Completion Status	Work in Progress

The major scope of work includes 2000-hourly routines of the main engines and gearboxes, 24-monthly steering gear routines, six-monthly fuel oil pump maintenance, shaft routines, underwater painting, internal compartment painting, and superstructure painting. Tank cleaning and deck blasting activities are currently in progress. Main engine and diesel generator routine maintenance activities are also underway. Docking of the vessel is scheduled for 12 June 2026.

Upcoming Projects

Project	Owner
ICGS Amartya	Indian Coast Guard
ICGS Agrim	Indian Coast Guard
RV SS Kama	Shipping Corporation of India
Bahadur	Indian Navy

Conclusion

The Production Department remains committed to maintaining the highest standards of efficiency, quality, and safety across all ongoing and upcoming projects. Through effective planning, close coordination, and disciplined execution, the department continues to ensure that project milestones are achieved in accordance with approved schedules, thereby supporting timely delivery, operational excellence, and customer satisfaction.

Highlights of the Month

Meeting with Praga Marine

A high-level business meeting was convened with senior representatives from Praga Marine on April 4, 2025, at Sea Blue Shipyard. The executive discussions focused on exploring long-term collaborations, technical synergies, and joint initiatives across commercial and defense shipbuilding sectors. By sharing core competencies, both organizations aim to strengthen project execution frameworks and expand future pipeline opportunities to deliver state-of-the-art maritime solutions.

A significant milestone in defense collaboration

Moments from the official signing and handing over ceremony of the ICGS C441 refit contract on 07 April 2026. This key defense partnership was formalized between senior Indian Coast Guard official DIG Shashi Bhushan [CSO-Refit, Regional Headquarters (Western Region) Mumbai] and SBSL DGM Lt. C.A. Thomas (Retd.). Securing this contract marks another major milestone in Sea Blue Shipyard's growing defense portfolio, reinforcing our commitment to national maritime security and fleet readiness through engineering excellence.

Marine Engineering Students Visit at SBSL

Bridging the gap between classroom theory and real-world shipyard operations, SBSL welcomed a group of 30 Marine Engineering students and 2 faculty members from the Noorul Islam Centre for Higher Education for a comprehensive industrial visit on 10 April 2026. The visit provided the young engineers with crucial exposure to live defense refits, structural repair works, and essential maritime technology pipelines.

Business meeting with senior Indian coast guard officials

Snap taken after a business meeting with senior Indian Coast Guard officials from Regional Headquarters Mumbai, CSO (Refit) DIG Shashi Bhushan and CSO (Tech) DIG Vinod Sakharkar of the Western Region. The strategic discussions focused on optimizing upcoming refit schedules, streamlining technical workflows, and reinforcing the robust partnership between SBSL and the Indian Coast Guard to ensure fleet operational readiness.

ICGS Abhinav: Technical Inspection by CGRPS

CGRPS DIG Gaurav Sinha inspecting the transom flange of the ICGS Abhinav waterjet assembly during an on-site progress evaluation on 08 April 2026. This critical inspection ensures the highest engineering precision and structural alignment standards are met for the vessel's propulsion system during its scheduled refit pipeline.

Refit progress review meeting of Indian Coast Guard vessels ICGS C441 and ICGS Abhinav

A comprehensive progress review meeting for Indian Coast Guard vessels ICGS C441 and ICGS Abhinav was convened during an official yard visit by senior Coast Guard leadership. The joint briefing, attended by CGRPS DIG Gaurav Sinha, Deputy Commandant Vinay Varma, SBSL CMD Mr. Manoj Prabhu, DGM Lt. C.A. Thomas (Retd.),

and DGM Cdr. Rajesh Kumar (Retd.), focused on monitoring critical technical benchmarks, streamlining material supply pipelines, and ensuring strict adherence to the operational deployment schedules of both defense assets.

Trip by District Collector for election campaigning

An official site inspection was conducted by the district collector and executive team to ensure compliance with administrative guidelines during the ongoing election period. The visit focused on reviewing security protocols, verifying shipyard deployment logistics, and ensuring complete adherence to statutory administrative norms without disrupting active defense and commercial vessel operations.

ICG Regional Technical Officer Reviews Refit Progress

Regional Technical Officer RTO (Engineering) Cmde Natendra Kumar from RHQ (West) Mumbai visited Sea Blue Shipyard Limited on 27 April 2026. The senior officer conducted a comprehensive on-site progress evaluation of Indian Coast Guard vessels ICGS Abhinav and ICGS C441.

The high-level briefing focused on reviewing key technical milestones, auditing structural alignment precision, and verifying quality control benchmarks across the propulsion and hull systems. This vital technical review ensures seamless alignment between the shipyard's engineering execution and the Coast Guard's rigorous operational deployment readiness standards.

Joint Technical Inspection: Ensuring Operational Excellence

Sea Blue Shipyard Limited, in close coordination with the Indian Coast Guard and technical partners Voyager Marine and Rocky, successfully concluded a comprehensive on-site technical inspection. This multi-agency evaluation involved a rigorous audit of technical deliverables, structural benchmarks, and engineering compliance for the ongoing defense refit projects. By integrating the specialized expertise of each team, the inspection confirmed that all recent installations and system upgrades meet the stringent quality and safety requirements of the Indian Coast Guard.

The successful conclusion of this joint review marks a critical milestone, ensuring that the vessels remain on track for their next phase of deployment with the highest levels of operational readiness and structural integrity.

Staff meetings

A series of comprehensive staff meetings for April and May was convened at Sea Blue Shipyard Limited (SBSL), bringing together department heads, project managers, and executive leadership. These periodic reviews serve as a vital platform for evaluating operational workflows, assessing project timelines.

These interactive sessions focused on auditing active commercial and defense refit contracts, streamlining workforce deployment, and optimizing material supply chains to eliminate operational downtime. Leadership also reinforced rigorous on-site safety protocols and quality compliance across all dry docks and fabrication workshops, ensuring the entire SBSL team remains aligned with its core goals of engineering precision, operational excellence, and timely project delivery.

Cochin Shipyard Delegates Visit SBSL

On May 22, 2026, Cochin Shipyard Limited's DGM Mr. Philip Thomas and AGM Mr. Joby Varghese visited Sea Blue Shipyard Limited (SBSL) to explore strategic collaboration. The high-level meeting focused on sharing best practices in modern shipbuilding infrastructure.

And discussing technical synergies to strengthen regional defense and commercial refit capabilities.

Coast Guard Senior Leadership Inspects SBSL Refit Progress

Senior Coast Guard officials, including DIG Vinod Sakharkar (CSO Tech, Regional Headquarters, Mumbai) and DIG Gaurav Sinha (Coast Guard Refit and Production Superintendent), conducted a high-level inspection visit to Sea Blue Shipyard Limited (SBSL) on May 25, 2026.

The visit focused on reviewing the ongoing refit operations of Indian Coast Guard vessels to ensure compliance with strict engineering benchmarks and operational deployment schedules.

Tandem Lifting & Jack-up Lifting of Indian Coast Guard Ship ICGS C441

A notable milestone achieved by SBSL during this period was the successful docking of ICGS C-441 using the innovative Tandem Lifting Method, marking the first docking operation of its kind executed in Kochi. This technically challenging operation demanded meticulous planning, detailed engineering assessments, and flawless coordination among multiple teams to ensure the safe and efficient docking of the vessel.

The successful execution of this unique methodology demonstrated SBSL's growing technical expertise, operational capability, and commitment to adopting advanced ship repair and docking solutions. The achievement received widespread appreciation from senior officials of the Indian Coast Guard and Indian Naval Headquarters, who recognized the operation as a significant advancement in indigenous docking capabilities. The accomplishment also drew commendation from leading private shipyards, highlighting SBSL's emergence as a technically competent and innovative player in the maritime and defence ship repair sector.

This landmark achievement not only reinforces SBSL's reputation for undertaking complex engineering challenges but also adds another prestigious technical milestone to the shipyard's expanding portfolio of successful projects, further strengthening its position as a trusted partner for the Indian Navy, Indian Coast Guard, and other maritime stakeholders.

New Office Inauguration at SBSL

Sea Blue Shipyard Limited proudly celebrated the inauguration of its brand-new office facility, marking a significant milestone in the company's journey of growth and transformation. Designed with modern infrastructure, enhanced workspaces, and improved amenities, the new office creates an environment that fosters collaboration, innovation, and operational excellence. This expansion reflects SBSL's ongoing commitment to strengthening its capabilities, supporting its growing workforce, and providing a productive workplace that inspires efficiency and teamwork.

The new facility stands as a symbol of the company's vision for the future and its dedication to continuous improvement. As we embark on this exciting new chapter, we look forward to achieving greater milestones together and driving sustained success for our organization, employees, and stakeholders. Here's to new beginnings, stronger partnerships, and a brighter future ahead.

Strengthening Maritime Ties

Rear Admiral Antony George (Retd), Director, along with Mr. Jamaludeen, Deputy Director of the Lakshadweep Administration, visited Sea Blue Shipyard Limited (SBSL) on May 3, 2026. The high-level visit was conducted as part of the shipyard's ongoing business development programmes, focusing on exploring strategic collaborations and future maritime partnerships.

SBSL Installed a New Heavy Lathe Machine

In a strategic move to boost its in-house mechanical engineering strength, Sea Blue Shipyard Limited (SBSL) has successfully acquired and commissioned a high-precision, heavy lathe machine.

Installed in the main fabrication and machine workshop, this new asset enhances SBSL's precision turning, facing, and custom threading capabilities for marine propulsion components. By bringing these processes in-house, SBSL improves quality control, reduces vendor dependence, and shortens lead times for critical refits, reinforcing its commitment to modernization and self-reliance.

Ongoing Civil Work at SBSL

Telescopic Shed for Slipway

The installation of a telescopic shed is a vital initiative aimed at minimizing environmental impacts such as noise and air pollution. Its enclosed, retractable design helps contain dust and airborne particulates generated during operations.

preventing their dispersion into surrounding areas and promoting a safer, cleaner working environment. In addition, the telescopic shed enhances operational efficiency by enabling uninterrupted activities under varying weather conditions. This facilitates continuous operations, improves productivity, enhances worker safety, and provides protection for materials and equipment from external environmental factors.

Current Status

Foundation works are currently in progress and are nearing completion. Since the proposed foundation alignment is in close proximity to the existing slipway, it is essential to protect the surrounding soil from erosion during the deep excavation process. To ensure the stability and safety of both the excavation and the slipway structure, sheet pile protection has been adopted between the foundation area and the slipway.

At present, the sheet piling materials have been delivered to the site, and installation activities are underway. The complete foundation work is expected to be completed by the end of June.

North Yard Development to Accommodate Interceptor Boats

The concrete paving of the North Yard is a key infrastructure upgrade designed to optimize interceptor boat operations and facility efficiency. This durable, low-maintenance surface provides a stable and safe working environment while ensuring long-term resilience against harsh environmental conditions.

Beyond improving structural longevity, the paved surface facilitates the seamless movement of vehicles, heavy equipment, and vessels. It also allows for the integration of advanced drainage and lighting systems, ensuring consistent and safe operational workflows.

Current Status

The North Yard development has been successfully completed, and the first Coast Guard vessel has already been docked for refit activities. Building on this achievement, SBSL is planning the next phase of expansion, which will extend the concrete yard to accommodate multiple interceptor boats and vessels of similar class simultaneously. As part of this upgrade, a dedicated lifting and sliding mechanism will also be installed to improve vessel handling capabilities, optimize workflow efficiency, and enhance the yard's overall operational capacity.

Labour Accommodation Facility

The new labour accommodation facility, located near the North Yard, the new labour accommodation facility provides comfortable, well-planned housing for the workforce. The complex features three accommodation buildings supported by dedicated kitchen and dining areas, along with separate restroom blocks, ensuring a safe and hygienic living environment that promotes employee well-being and productivity.

Current Status

The project is temporarily on hold pending approval of the Building Occupancy Certificate, which has been submitted to the local authorities and is currently under review. Once approvals are received, the remaining final activities will be completed to make the facility fully operational for workforce accommodation.

Infrastructure Development

SBSL has initiated the installation of heavy-duty solar roof trusses to integrate renewable energy into its operations. Engineered for coastal durability, these structures support high-capacity solar PV arrays, enhancing energy self-reliance and lowering operational costs. This project successfully aligns the shipyard's infrastructure with sustainable green manufacturing standards.

The old admin office has been renewed by removing the roof sheets before the monsoon season. This work was carried out as a preventive measure to ensure safety, facilitate renovation activities, and protect the structure from potential weather-related damage.

Happy Birthday to Our Amazing Team

This season brings a truly special double celebration to Sea Blue Shipyard Limited as we celebrated together the birthdays of our incredible team members and our Chairman & Managing Director, Mr. Manoj Prabhu. We extend our warmest wishes to Mr. Manoj Prabhu, thanking him for the visionary leadership that steers our organization toward new horizons of excellence. May this special day bring immense joy, good health, and continued success to our CMD and our entire shipyard family as we sail forward together.

Birthdays in April

Mr. Muhammad Mustafa

Mr. Sainesh K L
