Message from the Chairman & Managing Director

Dear Stakeholders,

We are pleased to share our business update and progress report for the months of April and May 2025. Despite the challenges posed by Q1 turbulence, particularly due to monsoons and heavy rainfall, we are pleased to report steady progress. Our infrastructure investments, totaling close to ₹10 crore, reflect our commitment to long-term growth. Immediate initiatives include solar power installation, Dolphin Point repair, labour quarters development, wharf & retaining wall concreting, and yard infrastructure upgrades.

We have recorded a good positive start for the quarter. Key completed projects such as ICGS Apoorva, a fast patrol vessel, AB Urja Shrota, fuel barge and Tug Mahabali, a tug vessel, have contributed significantly to our revenue stream. Our ongoing projects include FB Pradayak and FSI Cradle. Additionally, MV Ubaidulla, MV Cheriya, ICGS Anagh, and ICGS Amal are scheduled to begin repair work in the coming days, further strengthening our order book.

The upcoming vessel INS Kabra is expected to further boost Q2 performance. Discussions are in progress with Cochin Shipyard Limited for collaboration at the International Ship Repair Facility at Willingdon Island. The visit of Rear Admiral Aravind Raval, Senior Officer of the Indian Navy, marked a pivotal moment in strengthening our maritime business. New construction of strategic project Agnikul flat-top pontoon barge for ISRO, intended for recovering rocket boosters at sea is also planned.

We sincerely thank you for your continued trust and support.

Best Regards

Manoj Prabhu

Chairman & Managing Director

Sea Blue Shipyard Limited

Message from Deputy General Manager

Charting New Horizons: April–May 2025 Highlights from SBSL

At Sea Blue Shipyard Limited (SBSL), our journey toward Vision 2030 continues with purpose and momentum. The months of April and May 2025 witnessed major operational achievements, strategic engagements, and technological advancements, reaffirming SBSL's rising stature in India's maritime sector.

A defining moment came on 29 April 2025, when SBSL successfully executed the airbag undocking of the Indian Naval vessel FB Pradayak—the first-ever such operation for a defence vessel in India, approved by Naval Headquarters. This pioneering step sets a new benchmark, opening doors to future dockings of Navy and Coast Guard vessels using airbag-assisted methods.

SBSL also completed the independent docking of ICGS AB Urjashrotha—our first for a Coast Guard yard craft. The successful refits of ICGS Apoorva, ICGS AB Urjashrotha, Tug Mahabali, and Tug Balshil were completed and handed over, earning client commendations for quality and commitment.

Our Business Development team actively pursued opportunities with OEMs, prospective clients, and Cochin Shipyard, exploring turnkey refit projects at ISRF Kochi. A significant milestone was an invitation from the Indian Coast Guard to register FPV-class vessels in Chennai, signaling our expanding presence in the Eastern maritime zone.

Ongoing work includes the refit of FB Pradayak, FSI cradle fabrication, and critical RRC assignments. Confirmed dockings of two FPV-class vessels and one Navy yard craft reflect strong project continuity.

As we scale operations, optimize costs, and build stakeholder trust, SBSL remains focused on achieving our CMD's Vision 2030—a future driven by innovation, excellence, and a ₹1000 crore turnover target. With steadfast support from our defence partners and stakeholders, we are confident in building a resilient and impactful maritime legacy.

Together, we are charting new horizons.

Lt. CA Thomas (Retd)

**Deputy General Manager
Sea Blue Shipyard Limited**

Message from Manager - Purchase

The Purchase Department is pleased to share a summary of the key procurement activities undertaken during April and May 2025. This period was marked by proactive sourcing and timely delivery of essential materials, ensuring smooth progress of several critical projects at the yard.

Key Procurements:

Project FB Pradayak:

- Main Engine Spares
- Diesel Generator Spares
- Marine Paints

Project FSI Cradle:

- Steel Materials

Project Urja Srota:

- Marine Paints
- IRS-approved Steel Plates

Each procurement activity was executed with strong vendor coordination, adherence to technical specifications, and timely approvals to avoid any disruption in project schedules. Our team ensured that all materials sourced met stringent quality standards and were delivered within committed timelines.

In alignment with our department's commitment to excellence, we continue to focus on cost-effective procurement strategies while ensuring zero compromise on quality. The close collaboration between project teams and the procurement wing has been instrumental in meeting project milestones efficiently.

Going forward, the department aims to further strengthen supplier relationships and enhance planning processes to support upcoming projects with greater precision and agility.

Francis S Pulickal
Manager – Purchase

Message from CFO

The company is currently in a take-off phase after major improvements in its plant & machinery during the last financial year. All unsecured loans from directors have been fully repaid. Owing to improved business performance and stronger collections during the last quarter (December to March 2025), the company has successfully met its working capital requirements without relying on any external funding sources, apart from existing banking facilities. Given the positive momentum, the company is now focusing on investing in capital assets and undertaking major repairs of existing infrastructure. These initiatives aim to enhance our ability to attract more vessels and handle a wider range of repairs at the yard.

Essentially, through stringent cost control measures and financial discipline, we expect to generate cash inflows to support working capital at the current level of operations. However, additional financial assistance from banks have to be sought for major repairs, additional working capital requirements and for investments in capital assets to support expansion and achieve more profitable business conditions.

Balakrishnan
Chief Financial Officer

Insights from Production

Production Department Update: Ongoing and Completed Projects at the Yard

The Production Department continues to operate at a strong and steady pace, managing a diverse portfolio of ship repair and engineering fabrication projects. Our commitment to timely execution, precision workmanship, and high safety standards remains the cornerstone of all operations. Below is a summary of key projects currently active or recently completed at the yard.

SHIP REPAIR PROJECTS

1. ICGS Apoorva – Fast Patrol Vessel

Owner: Indian Coast Guard

Work Done: Special underwater maintenance

Work Period: 4th Feb to 7th April 2025

Completion Status: 100% Complete

This fast patrol vessel was brought in for a special underwater maintenance package. The work was completed smoothly, and the vessel was delivered on 7th April 2025.

2. FB Pradayak – Fuel Barge

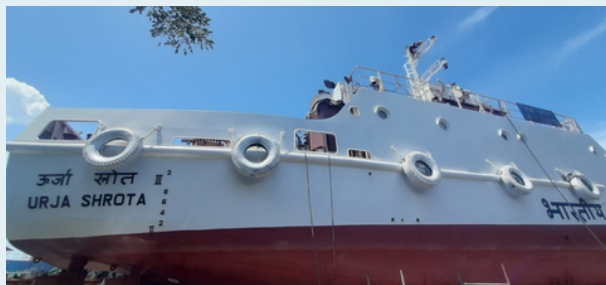

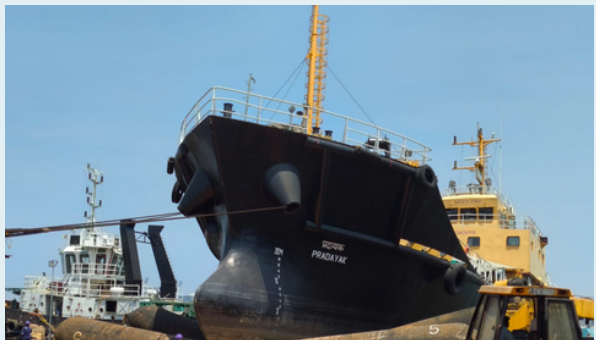

Owner: Indian Navy

Work Done: Balloon docking repair work

Start Date: 15th Feb 2025

Completion Status: 85% Complete

Currently undergoing afloat repairs, this project is progressing steadily.

3. AB Urja Shrota – Fuel Barge

Owner: Indian Coast Guard

Work Done: Underwater repair routines

Work Period: 8th April to 21st May 2025

Completion Status: 100% Complete

4. Tug Mahabali – Tug Vessel

Owner: Indian Navy

Client: Shoft Shipyard Pvt. Ltd.

Work: Guarantee Repair and Dry Docking (GRDD)

Work Period: 21st to 26th May 2025

Status: 100% Completed

GENERAL ENGINEERING WORKS

FSI Cradle Fabrication (95% Complete)

The Production Department remains focused on quality, precision, and client satisfaction.

Abey Mangalath Antony
Deputy Manager – Production

Highlights of the Month
